TaalMala is a software that allows the user to create and perform Indian rhythms directly on his computer. The intuitive, easy to use interface makes the use of the tool for the creation of taals very simple and convenient. TaalMala also offers a wide variety of predefined rhythms, which can be edited and rearranged to suit your needs. TaalMala Key Features: - Create rhythms using Virtual Tambura, Tabla, or TablaSawai - Adjust the tempo by using the metronome feature - Enable the user to modify the decibel emphasis of the taal - Adjust the pitch on the fly while editing the taal - Import and export of custom taals to Soundfont (ASIO) or OGG format TaalMala Screenshots: Note: This app is not affiliated with Taala.com or TaalMala.com iOS iPad Apps TaalMala is one of the best tools for composing Taals and does a pretty good job at it. It is very easy to use, quick to set up, and has some fantastic features. One thing that I am not a fan of, is the fact that Taalamala is an online application, which means you have to share your composition with the world to see it on the site. The question I have, is what happens when you have a group of friends/coworkers that want to collaborate together to create a super awesome composition? I mean, wouldn't be awesome to be able to take the file from within TaalMala and hand it over to a friend or coworker so that they could bring it up on the site without having to upload it themselves? My guess is that the app wouldn't be able to do that, and would be forced to upload it to the web page, which might be a possible security issue. That said, I still love this app! This was a review of the TaalMala app in the iTunes App Store. The app was paid, and the Apple Certification fee was subtracted from my purchase price. I am currently working on a taals and Indian music theory course that includes an iPad app along with a CD of various Indian Taals. This app would be perfect to get student's not only in my class, but also if they are interested in learning taals and music. For example if a student is in a taals class (the only

What's New In TaalMala?

TaalMala is the most advanced tool of its kind. With it, you can create your own percussion tracks in seconds. Each rhythm can be extended using loops, which you can easily adjust and modify to fit your composition perfectly. In addition, you can adjust the tempo and pitch of the music using an intuitive interface. Moreover, the tabla and pakhawaj playback controls are included, so you can check how your rhythm cycle sounds, both live and in real time. You can also set up multiple loops and save them for later use. Compose almost any taal directly on your computer TaalMala allows you to compose almost any rhythm cycle in a few seconds and save it to your hard drive. After that, you can select the desired template from a collection of over 100 original and customizable patterns. TaalMala also includes a variety of presets that allow you to focus on the composition itself without needing to worry about the technical details. TaalMala also comes with a built-in multi-track editor, allowing you to adjust the tempo, pitch and play each pattern separately. You can also fine-tune the beats using the built-in metronome. Adjust the tempo and control the pitch of your composition TaalMala also allows you to adjust the tempo, pitch and volume individually of each part of the track, all through the intuitive user interface. Furthermore, you can use the built-in metronome to fine-tune the tempo and check your song over and over again. In addition, you can change the playback controls for your real-time playback of your composition. In conclusion TaalMala is a very simple tool, yet highly-advanced and well-designed. It is intended for those with some experience with music composition and the tabla, rather than for those who are completely new. TaalMala is the most advanced tool of its kind.
